Bisley Base Limited

Dangerous Plants Policy

Bisley Base Ltd recognises that many plants are poisonous if eaten or capable of causing allergic reactions if handled. Accordingly, no plants on the list of the dangerous plants shown below are allowed on the premises without first conducting a risk assessment to review the degree of risk posed to the children.

The outside play area at the Club has also been checked for the dangerous plants listed below. Where a potentially dangerous plant exists and we are unable to remove it, we have conducted a risk assessment which takes into account:

- the ages and maturity of the children
- the degree of supervision required
- whether we need to restrict access to affected areas
- how children with allergies might be affected.

The following is a list of the most commonly found plants that staff should be aware of as posing a possible hazard. Note that this list is *not* fully comprehensive.

Common name	Latin name	Harmful
Indoor Plants		
Angels' Trumpets	(Brugmansia or Datura)	E
German Primula	(Primula Obconica)	T
Lantana	(Lantana)	E / T
